

YOUR MOVE

Your idea
deserves to *exist.*

Not as a note. As a product people can use.

Most ideas die in the *Notes app*.

Not because they were bad. Because building one used to mean a team, a budget, and a year you did not have.

WHAT CHANGED

That barrier
is *gone*.

One operator, the right AI stack, and a clear problem can now reach a working product in days.

I've done it. *Three times.*

01	Nexa-Health Welbodi Hospital EMR.	IN UAT
02	Nexa-Logistix LMIS Supply-chain OS.	IN PRODUCTION
03	Sprout 4-pillar family app.	BUILDING

Let's get yours *out of your head.*

In 72 hours, you could be looking at the thing you have been describing for years.

YOUR MOVE

Ready to
build it?

DM me "MVP" and I'll send back a 72-hour build plan.

Follow and watch the next one get built in public.
